

4 TOP ICS

ZERO TRUST

Zero-trust must be viewed holistically: It is proactive and a comprehensive approach to security at all levels of assets and participant.

01

Reducing risks in operation of brownfield assets by setting up control mechanism including all levels.

02

Improving process through implementation and "living" of IEC 62443.

03

Reducing the risks of the human factor and OT/ IT levels through implementation of strict micro-segmentation.

04

Increasing effectiveness of your operation through zero trust architecture with integrating policy automation, intelligence threat protection across security pillars .

Zero trust

IMPLEMENTING ZERO TRUST MODEL IN OT ENVIRONMENTS – A BETTER WAY TO PROTECT MODERN ENVIRONMENTS.
